	Sem-2		7124		1704		146		123	9241

**COMMENTAIRE :** Les ascospores sont en tête du classement des spores de moisissures avec une semaine plus humide.  
Les cladosporium sont en 2ème position. Alternaria, basidiospores, Aspergillaceae viennent ensuite.  
Les journées plus humides viennent favoriser l'émission des spores de moisissures dans l'air.
