| | Sem-2 | | 4728 | | 1722 | | 608 | | 0 | 7364 |

COMMENTAIRE : Les concentrations de spores de moisissures sont encore faibles en ce début d'année.

Les ascospores passent en tête du classement des moisissures de la semaine grâce à un temps plus humide et perturbé.

Attention aux spores de cladosporium et alternaria qui sont très allergisantes et bien présentes dans l'air dans plusieurs villes.
